

## PURCHASED POWER CHARGE ADJUSTMENT – MDPU 143

### APPLICABLE

To rate schedules as identified as MDPU Numbers: 138, 139, 140, 141, and 142

### CALCULATION OF PURCHASED POWER CHARGE ADJUSTMENT

There shall be added or credited to each monthly bill an amount equal to the total kWh billed during the month multiplied by the Purchased Power Charge Adjustment determined as follows:

- A) The total Purchased Power Cost including transmission expense estimated to be charged to Accounts 555 and 565 for the period of usage MINUS:
- B) The total revenue estimated to be recovered through application of the Purchased Power Charge from all customers for the period. ALL DIVIDED BY:
- C) The estimated kWh to be sold during the period.

### NOTE

Normally the Purchased Power Charge Adjustment will be calculated for billing for a six-month period beginning January 1<sup>st</sup> and July 1<sup>st</sup> of each year using the best information available to the Department at the time regarding the cost of purchased power and the amount of kWh to be sold during the six-month period. An adjustment shall be made each time that the Purchased Power Charge is calculated to reflect differences between estimated and actual kWh sold as well as to reflect differences between estimated and actual purchased power costs for the most recent six-month period for which actual data is available. This adjustment will be utilized in the following six-month Purchased Power Charge calculation to recover/credit any under collection/over collection of purchased power charges resulting from the previous months' billings. The Department reserves the right to adjust the Purchased Power Charge more frequently if purchased power costs or kWh sales deviate significantly from the estimates used to set the Purchased Power Charge.
